

Internship Presentation

Amar van Laar

Molecular Nutrition and Toxicology

Beta-glucans and immunity

My background

- Bachelor of Biological Health Sciences
- Nutrition minors
- MNH Molecular specialisation
- Thesis: Endocannabinoids, inflammation and carcinogenesis

The Journey

- Many options
- Who to contact?
- What to choose?

Don't give up

My Internship

- Food and Biobased Research
- KWF-funded PhD project
- Beta-glucans and Immunity
- To support immunotherapy?

The Activities

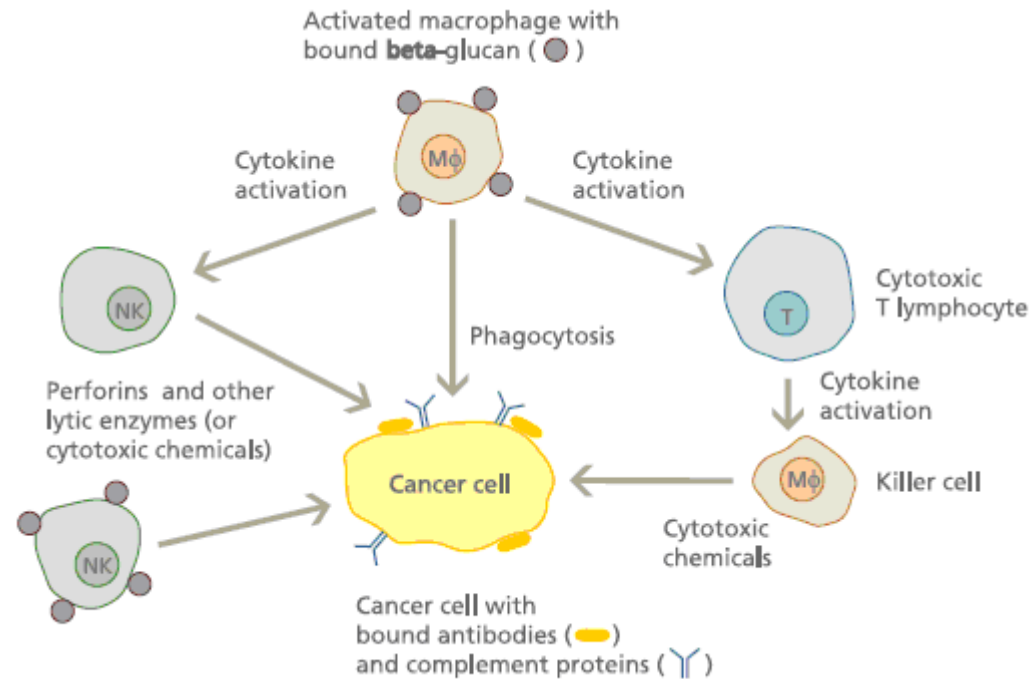

- The preparation
- The research: in vitro experiments
- The report
- Working conditions

My Experience

- Very nice project
- Relevance and Societal benefits

The larger project

Importance of Internship

- Skills and Knowledge
- To improve your CV
- Referees and contacts

Conclusion and advice

- Start early with orientation
- Don't give up
- Wonderful Experience
- The future
